## GENERAL TELEPHONE INSTRUCTIONS

All Denver extensions, with the exception of the Reservations' sales agents, are part of the CENTREX (398) exchange. Calls between numbers on CENTREX may be made by dialing only the last four digits of the number and only these numbers are shown for Denver listings in the directory. Calls from any other exchange must be made by dialing 398, plus the four digit number listed in the directory.

### Transfer of Calls in CENTREX.

Where necessary, inbound calls from telephones outside the CENTREX exchange may be transferred to any other station within the CENTREX exchange. This may be accomplished as follows:

1. Depress switch hook plunger (button on hand set rest) and release. This automatically places calling party on "hold" and brings up the CENTREX dial tone.
2. Dial the last four digits of the CENTREX number of the party you wish to transfer the calling party to.
3. Announce the call. The calling party will not hear the conversation.
4. Depress your switchboard plunger again and release. This will bring the calling party into the conversation and all three persons are connected; calling party, yourself and transfer party. In this manner all three people can talk.
5. If you are not needed in the conversation, hang up and the calling party will remain connected to the transfer party. Your CENTREX number will then be clear for other calls.

Do not transfer calls without checking reference data or the party called to determine the proper person to handle the call.

### Intercity Telephone Network.

Frontier maintains a switchboard at the Denver base which supplements the CENTREX system by providing connections to various leased intercity networks in order that authorized offices can communicate with offices in certain other cities without incurring long-distance toll charges. Denver offices having a requirement for this service have a two-digit PEX line to the switchboard. Our operators place calls through this means. As of December 1, 1969, trunk lines were available to the following cities: Aspen, Colorado; Billings, Montana; Chicago, Illinois; Colorado Springs, Colorado; Dallas, Texas; Washington, D.C.; Fort Worth, Texas; Grand Junction, Colorado; Grand Island, Nebraska; Junction City, Kansas; Las Vegas, Nevada; Los Angeles, California; North Platte, Nebraska; Lincoln, Nebraska; Kansas City, Missouri; New York City, New York; Ogden, Utah; Oklahoma City, Oklahoma; Omaha, Nebraska; Manhattan, Kansas; Phoenix, Arizona; Pueblo, Colorado; Seattle, Washington; Salt Lake City, Utah; and St. Louis, Missouri.

These trunk lines are part of the telephone system of each city and can be used to reach local numbers in the distant city. They may also be used where necessary long-distance calls must be made to reduce toll charges by placing the call through the city with the trunk line which is closest to the called location. This must be done through the switchboard operator who is to be advised of the long-distance call.

Frontier also maintains the following PLF circuits primarily for operations traffic, but these do appear in the switchboard. Conversations on PLF circuits can be heard by all stations and operations traffic has priority. Subject to these restrictions, they may be used for other traffic if necessary.

<u>Circuit #</u>	<u>Stations</u>
FP91945	ABQ - DEN - ELP - PHX - SAF - TUS
FP75917	DEN - LNK - MKC - OMA - STJ - STL
FP92069	COS - DEN - GJT - LAS - PUB - SLC
DP7307-001	AMA - BVO - DAL - DEN - ICT - LAW - MKC - OKC - TOP - TUL
DP7307-002	DEN - FSM - FYV - HOT - JLN - LIT - MEM - MKC - STL - TBN

The Frontier operator on the switchboard may be recalled only on inbound calls. you have received by depressing the switch hook plunger firmly and releasing it. This may not be done on outbound calls and will set up a disconnect signal if attempted.

### Outgoing Calls.

To make a Denver Metro call, Dial "9", no change in dial-tone, then dial your desired telephone number. For operator assistance, dial "9", then dial "0." For directory information, dial "9", then dial 411.

NOTE: All four-digit numbers for Frontier Airlines and Stapleton International Airport must be preceded by (398) when calling from the "outside."

### Long-Distance Calls.

Long-Distance calls should be made only if necessary and the following check list utilized.

1. Is the call really necessary;
2. Can teletype be used; and
3. Can the call be placed through a switchboard trunk line to reduce the cost?

Authorized personnel and offices have been furnished with local telephone numbers of the trunk lines for use in contacting other cities through the intercity network. These numbers and the use of these trunk lines are restricted to authorized personnel and they are not to be released to others in or out of the Company.

### Trouble Reporting.

Report trouble promptly! In Denver, Dial "9", no change in dial-tone, then dial 611. If assistance is required, call the Operational Services Department - Ext. 4872. In other cities check the local repair number and have it available.

### Directory Listings

All departments are responsible for advising DENGY promptly by memorandum of any changes in directory listings or any additions required. New directories will be issued each six months and when sufficient changes are involved, bulletin corrections will be made between directory issuance.
